Yogesh Kumar

A result oriented quick learner, team player with an amalgam of strong communication & interpersonal skills; **1 years of experience** in software applications.

WORK EXPERIENCE

MyOperator Pvt. Ltd., New Delhi — *Web Designer*

July 2017 – PRESENT

- Managing, producing and designing projects from brief to fulfillment.
- Ongoing design and maintenance of new and existing websites, web application interfaces and mobile application interfaces.
- Converting Photoshop design to HTML design using HTML5, CSS 3 and twitter bootstrap.
- Testing websites for functionality in different browsers & at different resolutions.
- Photoshop design of new interfaces using Adobe Photoshop.
- Designing websites that are easy and effective to use.
- Designing web campaigns for online initiatives, editorials, emails & banners.
- Enhancing the look, functionality and appearance of a website.

MyOperator (http://myoperator.co)

MyOperator is a replacement of the older EPABX – IVR system that helps a business manages its phone communication via a single number. It manages tracks and builds all your business phone communication needs and that too without incurring any setup cost or hurdle. VoiceTree provides MyOperator in a self managed environment.
I have worked on the following:
- Photoshop design of new interfaces using Adobe Photoshop.
- Converting Photoshop design to HTML design.
- Responsible for myoperator.co front and blog pages website design.
- Designing emails and web campaigns using Photoshop and HTML.
- Designing websites components which are effective and easy to use.
- Maintaining Wordpress theme for myoperator.co.

MyOperator Panel (https://app.myoperator.co)

This is a self managed call management system in which we can manage our business communication in DIY environment. It includes dashboard, ivr creation module, user management module, call logs section, reports etc.

Responsibility
- Photoshop design of new interfaces using Adobe Photoshop.
- Converting Photoshop design to HTML design.
- Responsible for web and mobile application interface design for myoperator.co.
- Designing various user web components using twitter bootstrap and JavaScript For better user experience.
